

Scoring Rubric

Part I. Calculate your **Overall Score**.

Add up your total points on the Self-Assessment.

- If you received 0-3 points, you are in *Early Tech*.
- If you received 4-7 points, you are in *Developing Tech*.
- If you received 8-10 points, you are in *Target Tech*.

Part II. Discover your detailed and unique **EdTech Locator profile**.

Regardless of your overall score, you may find that where you fall on the Locator differs for specific job responsibilities. For example, if your overall score puts you in the “Developing Tech” category, you may still find that you are in “Early Tech” for one responsibility and “Target Tech” for another. Determining where you fall on the Locator for each of the responsibilities is an important step in determining where to focus your energies in order to move to the next level.

First, fill out the following chart according to how you answered each survey question. Mark the cell that corresponds with each Question and Answer combination for your self-assessment.

	Question 1- Integrate Technology in Professional Development	Question 2- Attain Universal Access” Integration of UDL and AT for Differentiating Instruction	Question 3- Enhance Educators’ Skills on Differentiating Instruction	Question 4- Enhance the Leadership Skills of Administrators	Question 5- Implement Models of Professional Development
(a) Early Tech					
(b) Developing Tech					
(c) Target Tech					

This is your EdTech Locator Profile!

Use this chart to identify those responsibilities in which you scored low relative to others. By focusing on and increasing your level in these responsibilities first, you should be able to move up a level on your overall score as well.
